Haystack No. 1 and Sections 24 and Bibb Trespass

Draft RSE report will be finalized. About 100 acres out of 160-180 acres have contaminated soils at surface, some are 10' deep. Contaminated soils are migrating Northeast off mine boundary. Contaminated soils are also migrating toward the church and within 100' of a house with gamma measurements of 2 to 5 times background. There is no estimated volume of waste.

2015 Goals

- Initiate enforcement with PRPs
- Develop workplan and removal strategy
